CE 0481

VOSTRA GmbH was founded in 1985 with the goal of developing, manufacturing and marketing high-quality consumables for the neurosurgery, ENT and general surgery.

Our customers needs have always been the focus in our strive for excellence. Dedication and expertise have nourished an international customer base which we supply on short notice – world wide.

VOSTRA® – excellence in medical products.

Rhinotamp® latex-free/Rhinotamp® latex

Nasal tamponades for hospital and medical practice

Rhinotamp® latex-free/Rhinotamp® latex

Product Features

Nasal tamponades for hospital and medical practice

Rhinotamp® nasal tamponades are made of thermally stable foam which is endowed with an adhesion resistance coating. Rhinotamp® nasal tamponades are supplied with a reinforced thread which is thoroughly attached to guarantee maximum safety.

The special features of the coating prevent adhesion to the nasal mucosa and provide for easy atraumatic and painless removal.

The latex Rhinotamp® products are supplemented by latex-free Rhinotamp® nasal tamponades, designed for patients with latex allergies.

Rhinotamp® nasal tamponades are particularly suited for the following indications:

- conchotomy
- epistaxis
- rhinoplasty
- sinus surgery
- ethmoid bone surgery

Features

Safety

Rhinotamp® nasal tamponades are supplied with a reinforced thread and provide together with its special coating for painless and atraumatic removal.

Quality

Rhinotamp® nasal tamponades are manufactured with great care and under meticulously defined cleanroom conditions. A continuous microbiological process control guarantees maximum product safety.

Rhinotamp® latex-free/Rhinotamp® latex
